

Financial Management

Enterprise-Grade Fund Accounting for Government

A complete financial platform built for government accounting standards -- fund management, budget control, AP/AR, and GAAP-compliant reporting in one system.

Government finance teams operate under fund accounting requirements that commercial software ignores. Brixton Financial Management is built for the public sector -- handling fund-based budgeting, grant tracking, encumbrance accounting, and multi-department cost allocation without workarounds.

Core Capabilities

- Fund accounting with segregation by fund, department, program, and grant
- Multi-year budget management with carry-forward and amendment workflows
- Encumbrance and pre-encumbrance tracking to prevent over-commitment
- Accounts payable with three-way match (PO, receipt, invoice)
- Accounts receivable with aging and payment tracking
- General ledger with drill-down to source transactions
- Bank reconciliation with exception flagging
- Fixed asset management with depreciation schedules
- Grant management with expenditure tracking against award budgets

Reporting and Compliance

- GAAP-compliant financial statements: balance sheet, income statement, cash flow
- Budget vs. actual reports at any level of the org hierarchy
- Grant expenditure reports in common federal and state formats
- Audit trail on every transaction -- who posted, when, and from what source
- Year-end close automation with rollover posting
- Custom report builder with export to PDF and Excel

Budget Control and Workflow

Every transaction runs through a configurable budget check before posting. Department heads submit budget amendments through the system, routed to finance for approval. Budget transfers between line items are logged, approved, and reflected in real time. Fiscal year rollover is automated with configurable treatment for unspent funds by fund type.

Grant Management

Each grant award is tracked as a separate cost center with its own budget, allowable cost rules, and reporting schedule. The system flags expenditures that approach the award ceiling and generates draw-down summary reports. Grant closeout checklists are built in.

Procurement Workflow

Purchase requisitions route through configurable approval chains by department and dollar threshold. Approved POs create encumbrances automatically. Receipt entry against the PO triggers three-way match. Vendor invoices that pass match post to AP automatically. Exceptions route to a review queue with full audit trail.

What We Configure For You

- Chart of accounts mapped to your existing fund and department structure
- Approval routing configured to your org chart and dollar thresholds
- Branded portal with your agency logo, color scheme, and domain
- Custom report templates matching your board or state reporting requirements
- Role-based access: Finance Director, Department Head, Accounts Payable, Read-Only Auditor
- User training sessions for each role during onboarding

Platform Specifications

White-Label Deployment

Brixton Financial Management can be deployed under your brand. Your agency logo appears throughout the platform and all generated documents. The platform URL runs on your domain. All outbound system emails come from your address. No Brixton branding is visible to your users unless you choose to display it.

Deployment	Cloud-hosted and managed by Brixton Systems.
Access	Browser-based. No software installation required.
Mobile	iOS and Android companion app available.
Data Security	AES-256 encryption at rest and in transit. Role-based access control.
API	REST API available for reporting and data export use cases.
Backups	Daily encrypted backups with point-in-time recovery.
Uptime	99.9% uptime guarantee on Brixton-managed hosting.
Support	Email and phone support. Dedicated onboarding assistance.
Training	Live virtual training sessions for all user roles during onboarding.
